

Bing vs Google image search ladies and gentlemen. (whatever)

by [obvious-throwaway-](#)

Exact same search: *black people at apartments get in fight*

[Bing](#)

[Jewgle](#)

I thought the entire concept of a search engine was to bring you relevant results, not someone else's personal opinion? I can't believe these kikes literally used the motto, "do no evil". Unfuckingbelievable.

Absolutely obvious search result manipulation. Good experiment. My experience for dropping ggle was when it became impossible to find reviews or forums for certain mechanical parts. All results were ads. Pages and pages of ads.

This, I specifically ad in the word review or forum, but that doesn't seem to work as well nowadays.

Either way, if you're looking for a new (better) search engine, I'd advise you try out searx.me. The vids and pictures results are lacking, but it does VERY well on the standard search. I've been using if for a week or so now, and no regrets yet.

Google, once the best search engine, is now the worst.

But Google is not a search engine anymore. It is propaganda now. I feel odd saying this because it is so obvious.

same. At some point back around 2014 they just stopped giving legit results for things I wanted to know. I started bouncing around and eventually stuck with duck duck go cause I can find stuff I want with that.

This is really depressing. In a world where we hold up microsoft as a positive example there may be no hope at all.

Last night my wife was sure drama was unfolding outside of my home. Nope, just young black women walking by, using the street instead of the sidewalk for some reason.

It's just that they still grab a lot of their results from Google.

The first result looks like an orthodox Jew, followed by some white people and the. A diverse one. This is really interesting what you and OP turned up.

I'm curious but don't want to provide google or bing with those search terms from my IP address. Screenshots?

Anyone who isn't using a VPN is a fooltard

Everyone keeps saying that, but your just handing over your trust from one company to another. For all you know the VPN is a Kike honeypot waiting to release every post you've made and your home address. Every time I ask for legit trusted VPN's, everyone clam's the fuck up. So go on, tell us what VPN we should be using?

I work with a pretty lefty guy. Yesterday I had him search for "white couple" using Google. I think the results hit him pretty hard.

It's the "get in a fight" part that's being blocked, not the "black" part.

Don't be a rube. Theyre blocking links to violence.

So this has nothing to do with the words "white" or "black", curious, <https://www.google.com/search?q=whites+get+into+a+fight&source=lnms&tbm=isch>

On a side note, I use spend a lot of time searching for information and content as part of my profession. 100% unpolitical content most of the time and I cannot use Google anymore, whatever they have been doing to their algorithm they have fucked up huge datasets it seems. I have switched over to

DDG now and I am very happy with the results for all search result types.

Years back Google had a retro search where you could use an older database to see the web five, ten years earlier. That made technical search results so much better.

And don't get me started about how they ruined DejaNews back in the day.

[–] [Warnos44](#) 1 points (+1|-0) 7.1 hours ago

Lol. Replace black with white at both.

Google just gives white apartments, pretends the other words aren't there. Hey we live in a peaceful world, goys!

Bing just gives more blacks. Guess it's fucking racist.

Literally everything you search on Bing brings up some kind of porn. I demonstrated this for a friend the other day. But it is by far the superior image search engine for now.

[permalink](#)

[–] [boekancier](#) 0 points (+0|-0) 6.1 hours ago

Startpage: about the same result as google, no fights, very 'civilized'. DuckDG: much black blood to be seen.

[–] [Gorillion](#) 0 points (+0|-0) 5.6 hours ago

Startpage just accesses Google in an anonymous session though doesn't it?

Yes.

[permalink](#) [parent](#)

[–] [Pixel_loves_Polygon](#) 0 points (+0|-0) 4.1 hours ago

Basically yes. It's Google without the tracking. I like that it gives you the option to use a proxy when you click links. Slow as fuck but it's a nice feature. Shit image search though.

Yeah it has been months now that every time I use google I feel like it's not diving at the depth it used to be capable of, maybe it's just me looking for more than usual obscure stuffs

Before, it was like when all search engines failed, use google, the eye of sauron, and you'll find anything

Today not so much, it feels like it's not that much better if any better

That said, oddly, you still get the best result for "jew msm"

<https://www.google.com/search?q=jew+msm&source=lnms&tbm=isch>

<https://www.bing.com/images/search?q=jew%20msm>

"white people at apartments get in fight" on Google is about the same as the black people result.

I don't think this is manipulation but different intrinsic traits of the engines.

Or, you know, there's just not that much content to search for?

[https://duckduckgo.com/?](https://duckduckgo.com/?q=white+people+at+apartments+get+in+fight&t=hg&iax=images&ia=images)

Basically get the top line here. And even then a few of them look awful mutty.

You're making a false equivalence.
