A recent study of DACA Dreamers found that most of these new Democrat voters reside in Republican states.

Paul Ryan, Mitch McConnell and Democrats are determined to pass amnesty for this group of illegal aliens.

And today a NEW REPORT found that there are actually **3.6 MILLION DREAMERS IN THE UNITED STATES!**

According to previous numbers the DREAMER populations would put several states in play.

But that was with an **original estimate** of around **800,000 DREAMERS** in the US.

This new report GUARANTEES that Florida, Arizona, Georgia and North Carolina will ALL TURN BLUE!

And TEXAS will be in play!

According to USCIS — with the 800,000 original number — there are significant populations in blue states:

379,000 Dreamers in California (a deep blue state)

30,000 in Washington

72,000 in Illinois

71,000 in New York

38,000 in New Jersey

30,000 in Colorado

And according to **USCIS** there are also significant numbers of Dreamer illegals in several red states:

211,000 in Texas

47,000 in Arizona

72,000 in Florida

41,000 in Georgia

47,000 in North Carolina

In 2016 President Trump won **these red states** by the following amounts:

Texas – 807,179

Arizona – 91,234

Florida – 112,911

Georgia – 211,141

North Carolina – 173,315

President Trump was a very strong Republican candidate collecting more Republican votes than anyone in history.

DACA amnesty could give Arizona, Florida, Georgia and North Carolina to the Democrat Party.

And then once a Democrat is elected they will open the borders to millions more third world immigrants to vote Democrat.

This is what Paul Ryan, Mitch McConnell and Democrats want to happen.
