

HOW SILICON VALLEY RIGS THE GOVERNMENT

IN THE MID 2000'S, TRILLIONS OF DOLLARS OF FOREIGN MINING SCHEMES FOR LITHIUM, INDIUM, COBALT, URANIUM, COPPER, ETC. WERE BEING TRADED FOR POLITICAL CAMPAIGN FINANCING AND SILICON VALLEY INTERNET "SOCIAL MEDIA ENGINEERING" WHICH WAS USED TO RIG PRESIDENTIAL ELECTIONS.

DOE, CIA, USAID, DOT, EPA AND OTHER AGENCIES WERE INFECTED WITH CORRUPTION TO ATTEMPT THIS SCHEME. THE SCHEME WAS BACKED BY SILICON VALLEY "CLEANTECH" BILLIONAIRES IN EXCHANGE FOR MONOPOLIES AND PROFITS. THOSE WHO REPORTED THE SCHEME WERE ATTACKED AND ALSO DEFAMED WITH MEDIA HIT-JOBS. THESE ARE REPORTS FROM INVESTIGATORS, CONGRESS AND LAW ENFORCEMENT ON THOSE USES OF ELECTRONIC AUTOMATED ELECTION MANIPULATION TRADED FOR CRONY GOVERNMENT PAYOLA DEALS:

WHO PAYS FOR AND COORDINATES THE SILICON ELECTION RIGGING:

Eric Schmidt
Jared Cohen
Larry Page
Mark Zuckerberg
John Doerr
Ray Lane
Tom Perkins
Elon Musk

John Podesta
Vinod Khosla
Steve Spinner
Steve Westly
George Soros
Cheryl Sandberg
David Plouffe
and their associates

WHAT ARE THE TACTICS AND TECHNOLOGIES THAT GOOGLE, FACEBOOK, TWITTER AND THEIR LOBBYISTS USE TO RIG ELECTIONS?:

- Hired Trolls with huge clone farms of tablets they use to pretend to be different users online.
- Use of your SS# to contain a single psychological data file and psych analysis of you based on anything you touch online, in order to calculate the best way to manipulate you for votes.
- Automated Troll server farms
- Off-Shore Troll server farms
- Chinese High Volume Fake Account Suppliers
- Synchronized Character Assassinations
- Massive Fake User Replicators In Order To Trick Advertisers Into Thinking Real People Are Using Twitter, Google, etc.
- Bot Farms of Hundreds of Thousands of Servers
- Gawker Media Fake News Organizations
- Hired Fake Comment Producers
- Automated Fake Comment Producers
- DNS Faker Routers
- IMEI Re-Write High Density Chip Boards
- Sting-Ray Interception and Analysis
- Google's Control of Most Web Data for Covert "Mood

Manipulation"

- While Google and Facebook rig their algorithms and search filters to manipulate results and censor news, they have also purchased, or contracted, the following products which they use for political manipulation:
 - Dataminr directly licenses a stream of data from Twitter to spot trends and detect emerging threats to a Candidate who has promised payola to the Silicon Valley billionaires
 - Geofeedia collects geotagged social media messages to monitor activists locations in real time.
 - PATHAR mines social media to determine networks of association and track Alt-Right people to their friends
 - TransVoyant analyzes data points to deliver insights and predictions about global events and apply them to your political intentions.
 - Aquifi, 3D vision software solutions makes a real-time graph of how the public's mood is
 - Beartooth, Decentralized mobile network allows activists to be spied on
 - Palantir, Predicts how to manipulate the mood of the public for campaign speeches
 - CliQr, Hybrid cloud management platform. Big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.
 - CloudPassage, On-demand, automated infrastructure Big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.
 - Databricks, Cloud-hosted big data analytics and processing platform. Big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.
 - Dataminr, Situational awareness and analysis at the speed of

social media. Big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.

- Docker, Open platform to build, ship, and run distributed applications for big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.

- Echodyne, Next-generation electronically scanning your mobile devices for political comments.

- Epiq Solutions, Software-defined radio platforms and applications for tracking public mobile devices.

- Geofeedia, Location-based social media monitoring platform for big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.

- goTenna, alternate network for off-grid smartphone communications to put back-doors in

- Headspin, Network-focused approach to improving mobile application performance for big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.

- Interset, Inside political detection using analytics, machine learning, for big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.

- Keyssa, Fast, simple, and secure contactless data transfer for big data exploration of your credit cards, visualization, and analytics platform for public political analysis and social media manipulation.

- Kymeta, Antenna technology for broadband satellite communications for big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.

- Lookout, Cloud-based mobile cybersecurity for big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.
- Mapbox, Design and publish visual, data-rich maps for big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.
- Mesosphere, Next-generation scale, efficiency, and automation in a physical or cloud-based data center for big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.
- Nervana, Next-generation machine learning platform to create automated trolls
- Orbital Insight, Satellite imagery processing and data science at scale for Elon Musk's spy satellites.
- Orion Labs, Wearable device and real-time voice communications platform to help consumers spy on themselves.
- Parallel Wireless, LTE radio access nodes and software stack for small cell deployment to hack voters mobile phone locations.
- PATHAR, Channel-specific social media analytics platform for big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.
- Pneubotics, Mobile material handling solutions to automate tasks of robot trolls tapping on vast numbers of tablets.
- PsiKick, Redefined ultra-low power wireless sensor solutions to spy on your devices.
- PubNub, Build and scale real-time apps for big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.
- Rocket Lab, Launch provider for small spy satellites
- Skinciential Sciences, Novel materials for biological sample collection of the smells and organics of crowds in order to sense their moods.

- Soft Robotics, Soft robotics actuators and systems mobile material handling solutions to automate tasks of robot trolls tapping on vast numbers of keyboards.
- Sonatype, Software supply chain automation and security for big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.
- Spaceflight Industries, Small spy satellite launch, network, and imagery provider
- Threatstream, Leading enterprise-class political intelligence platform for big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.
- Timbr.io, Accessible code-driven analysis platform. Big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.
- Transient Electronics, Dissolvable semiconductor technology so you can swallow a bugging device to get rid of it.
- TransVoyant, Live predictive intelligence platform. Big data exploration, visualization, and analytics platform for public political analysis and social media manipulation
- TRX Systems, 3D indoor location and mapping solutions. Big data exploration, visualization, and analytics platform for public political analysis and social media manipulation.
- Zoomdata, Big data exploration, visualization, and analytics platform for public political analysis and social media manipulation
- And much more...

=====

Silicon Valley's In-Q-Tel private services spy company has also developed a special technology laboratory in Silicon Valley, called

Lab41, to provide tools for the intelligence community to connect the dots in large sets of data. In February, Lab41 published an article exploring the ways in which a Twitter user's location could be predicted with a degree of certainty through the location of the user's friends. On Github, an open source website for developers, Lab41 currently has a project to ascertain the "feasibility of using architectures such as Convolutional and Recurrent Neural Networks to classify the positive, negative, or neutral sentiment of Twitter messages towards a specific topic." Collecting intelligence on foreign adversaries has potential benefits for counterterrorism, but such CIA-supported surveillance technology is also used for domestic law enforcement and by the private sector to spy on activist groups. Palantir, one of In-Q-Tel's earliest investments in the social media analytics realm, was exposed in 2011 by the hacker group LulzSec to be in negotiation for a proposal to track labor union activists and other critics of the U.S. Chamber of Commerce, the largest business lobbying group in Washington. The company, now celebrated as a "tech unicorn" — a term for start-ups that reach over \$1 billion in valuation — distanced itself from the plan after it was exposed in a cache of leaked emails from the now-defunct firm HBGary Federal.

Yet other In-Q-Tel-backed companies are now openly embracing the practice. Geofeedia, for instance, promotes its research into Greenpeace activists, student demonstrations, minimum wage advocates, and other political movements. Police departments in Oakland, Chicago, Detroit, and other major municipalities have contracted with Geofeedia, as well as private firms such as the Mall of America and McDonald's. Although these Silicon Valley "Big Data" systems have missed every major

terror attack. Google's investors keep selling their crap to the U.S. Government.

Lee Guthman, an executive at Geofeedia, told reporter John Knefel that his company could predict the potential for violence at Black Lives Matter protests just by using the location and sentiment of tweets. Guthman said the technology could gauge sentiment by attaching "positive and negative points" to certain phrases, while measuring "proximity of words to certain words." Privacy advocates, however, have expressed concern about these sorts of automated judgments. "When you have private companies deciding which algorithms get you a so-called threat score, or make you a person of interest, there's obviously room for targeting people based on viewpoints or even unlawfully targeting people based on race or religion," said Lee Rowland, a senior staff attorney with the American Civil Liberties Union.

Why Even Donald Trump Can't Save Twitter

"It's an increased value asset that's getting more valuable every day," Ross Gerber says. "And management is unable to capitalize on it"

[Matt Pressberg](#) |

By most forms of logic, Twitter should be one of most successful social media companies on the planet.

President Donald Trump largely communicates with the American people through Twitter. He has 43 million followers between the @realDonaldTrump and @POTUS accounts, and other national politicians, media members and stock traders pretty much have to follow him as part of their job. His tweets

have even moved markets (although Wall Street seems to be [wisening up](#)), and last week, Trump [said](#) Twitter was integral in getting him elected.

So why can't Twitter turn itself into a functional company with a healthy stock price? The company's stock closed Tuesday at \$14.54 a share, well off its 52-week high of \$25.25 — and significantly south of its 2013 IPO price of \$26 a share.

Also Read: [Why Twitter is Upset That Lewis Tan Wasn't Picked to Play 'Iron Fist'](#)

Blame CEO Jack Dorsey and his team, said Ross Gerber, the president and CEO of Gerber Kawasaki Wealth and Investment Management and a frequent CNBC commentator. "It's an increased value asset that's getting more valuable every day," Gerber told TheWrap. "And management is unable to capitalize on it."

The company's market cap sits at about \$10.5 billion — less than half of Snapchat parent Snap Inc. In its most recent quarter, Twitter reported a year-over-year 5 percent dip in U.S. advertising revenue and only increased its monthly active user base by 4 percent. That's despite becoming more important than ever to people involved in the information economy, Gerber said.

Twitter did not immediately respond to TheWrap's request for comment on its fortunes in the President Trump era.

Also Read: [How Kellyanne Conway Got Donald Trump to Follow Her on Twitter](#)

“There’s no doubt in my mind that Trump and the way Twitter is being used now has increased its value,” Gerber said. “Everybody in the media is on Twitter. It’s the place where news breaks the fastest. When something’s going on in the market, I don’t Google it — I go on Twitter. The Bloomberg terminal is old news.”

There is no possible doubt that Twitter is an election rigging tool and Fake News processor for Barack Obama and Hillary Clinton!

How Google Runs The “Deep State” Government That Is Screwing With Trump and The Entire U.S. Government

By Andres Fauceyt

Eric Schmidt was the head of the Deep State Government when it was formerly called New America Foundation. What a warm and cozy name for an organization as nasty as Satan’s anus. New America’s sister organization is a “charity organization” called In-Q-Tel. In-Q-Tel funded Eric Schmidt’s Google and claims to be a “non-profit charity which provides technology to the CIA...”. Google is the single largest financier of Barack Obama and Hillary Clinton. Google is the single largest beneficiary of Barack Obama and Hillary Clinton. In-Q-Tel was the owner of the airplanes that were registered on FAA and DEA arrest records as

“Cocaine 1” and “Cocaine 2”. They had five tons of cocaine on them at the point that the DEA swooped in on the “charity” In-Q-Tel airplanes. In-Q-Tel staffs Elon Musk’s SpaceX spy satellite company. The head of Silk Road, the largest online illegal drug operation worked for Elon Musk at SpaceX. Most of Obama’s and Clinton’s key staff came from Google. Gawker Media's attack operation was conduited through Google accounts. Google makes billions of dollars from various government spy contracts. Pretty much everybody at Google hates Donald Trump and all Republicans. All of Google’s profits rely on kick-back deals with crony Democrats.

Those are facts. Check these facts out for yourself on any non-Google search engine. They are not arguable and they are proven by SEC and FTC filings, IRS filings, arrest records and other indisputable public documents.

Eric Schmidt had New America Foundation, Google and In-Q-Tel suddenly try to delete all connections to him. Even they could not erase it all. When you “follow-the-money”, the dirty paths of corruption and technology mobster-ism are clear.

Because Larry Page, Eric Schmidt and Elon Musk believed that the IRS, Barack Obama, Eric Holder, the CIA and the Federal Reserve Bank were personally running cover for them, they decided to push the envelope and see how much they could get away with. They were certain that Google’s and In-Q-Tel’s technology could rig the 2016 election for Hillary, just like they did for Obama’s election, they did not foresee that the GOP had been covertly circumventing their coup attempt for years.

Now that Trump is in office, the bewildered Obama Coup organizers are scattered and they do not know what to do except try to keep their little coup going. Hacking Donald Trump seemed like an easy and reasonable task to the Google-ites who

had such an “above-the-law” world of anything-goes for so long. Now, not so much.

The holy trinity of Sessions/Gowdy/Chaffetz are delighting the public as they rail into the corrupt big wigs of Washington DC. Now it is time, though, for Congress to get serious and forcefully rail into Google, New America Foundation and In-Q-Tel and terminate them once and for all. They are not in service to America. They are criminal operations out to line their own pockets at the expense of the public and the Constitution.
