

SOCIOPATH SILICON VALLEY OLIGARCHS TRYING TO BUILD LIBERAL POLITICAL CULT CITY-OF-DELUSION IN NORTHERN CALIFORNIA

Fri, 25 Aug 2023 13:43:54, swmof88, [post_tag: flannery-associates, post_tag: jan-sramek, category: news, post_tag: sociopath-silicon-valley-oligarchs-trying-to-be-liberal-political-city-of-delusion-in-northern-california, post_tag: the-silicon-valley-sociopath-elite-who-want-to-build-a-liberal-cult-city-from-scratch]

The Silicon Valley Sociopath Elite Who Want to Build a Liberal Cult City From Scratch

- Like a permanent Burning Man city for tech assholes
- Some of the biggest sociopath Silicon Valley politics-rigging douchebags on Earth are involved
- Sonoma has a high concentration of Republican's and gun owners who are against these Obama/Biden financiers opening a woke urban cult city in their midst
- Everyone in this city will be data-raped and spied on with Silicon Valley data harvesting and no cash will be allowed

The Silicon Valley Elite Who Want to Build a City From Scratch

In 2017, Michael Moritz, the billionaire venture capitalist, sent a note to a potential investor about what he described as an unusual opportunity: a chance to invest in the creation of a new California city.

The site was in a corner of the San Francisco Bay Area where land was cheap. Mr. Moritz and others had dreams of transforming tens of thousands of acres into a bustling metropolis that, according to the pitch, could generate thousands of jobs and be as walkable as Paris or the West Village in New York.

He painted a kind of urban blank slate where everything from design to construction methods and new forms of governance could be rethought. And it would all be a short distance from San Francisco and Silicon Valley. "Let me know if this tickles your fancy," he said in the note, a copy of which was reviewed by The New York Times.

Since then, a company called Flannery Associates began buying large plots of land in a largely agricultural region 60 miles northeast of San Francisco. The company, which has little information public about its operations, has committed more than \$800 million securing thousands of acres of farmland, court documents show. One parcel after another, Flannery made offers to every landowner for miles, paying several times the market rate, whether the land had been listed for sale or not.

The purchases by a company that no one in the area had heard of and whose business was a mystery have become the subject of heavy speculation and developing [news stories](#), rattling landowners, local supervisors, the nearby Air Force base and members of Congress. Was Disney buying it for a new theme park? Could the purchases be linked to China? A deep water port?

Flannery is the brainchild of Jan Sramek, 36, a former Goldman Sachs trader who has quietly courted some of the tech industry's biggest names as investors, according to the email and people familiar with the matter. The company's ambitions expand on the 2017 pitch: Take an arid patch of brown hills cut by a two-lane highway between suburbs and rural land, and convert into it into a community with tens of thousands of residents, clean energy, public transportation and dense urban life.

The company's investors, whose identities have not been previously reported, comprise a who's who of Silicon Valley, according to three people who were not authorized to speak publicly about the plans. They include Mr. Moritz; Reid Hoffman, the LinkedIn co-founder, venture capitalist and Democratic donor; Marc Andreessen and Chris Dixon, investors at the Andreessen Horowitz venture capital firm; Patrick and John Collison, the sibling co-founders of the payments company Stripe; Laurene Powell Jobs; and Nat Friedman and Daniel Gross, entrepreneurs-turned-investors. Andreessen Horowitz is also a backer. It was unclear how much each had invested.

Brian Brokaw, a representative for the investor group, said in a statement that the group was made up of "Californians who believe that Solano County's and California's best days are ahead." He said the group planned to start working with Solano County residents and elected officials, as well as with Travis Air Force Base, next week.

In California, housing has long been an intractable problem, and Silicon Valley's moguls have long been frustrated with the Bay Area's real estate shortage, and the difficulty of building in California generally, as their work forces have exploded. Companies like Google have clashed with cities like Palo Alto and Mountain View over expanding their headquarters, while their executives have funded pro-development politicians and the "Yes in my backyard" activists who have pushed for looser development and zoning laws in hopes of making it easier to build faster and taller.

The practical need for more space has at times morphed into lofty visions of building entire cities from scratch. Several years ago, Y Combinator, the start-up incubator, announced an initiative with dreams of turning empty land into a new economy and society. Years before that, Peter Thiel, the PayPal co-founder and billionaire Facebook investor, [invested](#) in the [Seasteading Institute](#), an attempt to build a new society on lily pad-like structures in the law-and-tax free open ocean.

But while these ideas have garnered lots of attention and curiosity — lauded in some corners for vision and derided in others for hubris — they have been little more than talk.

As Flannery began seeking property, it bought so much land, so fast, that it spooked locals who had no idea who the buyer was or the plans they had in mind. Catherine Moy, the mayor of Fairfield, Calif., started posting about the project on Facebook several years ago after she got a call from a farmer about some mystery buyer making offers throughout the county. In an interview, Ms. Moy said she went to the county assessor's office and found that Flannery had purchased tens of thousands of acres.

John Garamendi, Democrat of California, who along with [Mike Thompson](#), a Democrat, represents the surrounding region in Congress, said that he has been trying to figure out the company's identity for four years.

"I couldn't find out anything," he said.

On Friday, he said that had suddenly changed. This week representatives for Flannery reached out to him and other elected officials requesting meetings about their plans. That meeting is now being scheduled, he said.

"This is their first effort, ever, to talk to any of the local representatives, myself included," he said.

The land that Flannery has been purchasing is not zoned for residential use, and even in his 2017 pitch, Mr. Moritz acknowledged that rezoning could "clearly be challenging" — a nod to California's notoriously difficult and litigious development process.

To pull off the project, the company will almost certainly have to use the state's initiative system to get Solano County residents to vote on it. The hope is that voters will be enticed by promises of thousands of local jobs, increased tax revenue and investments in infrastructure like parks, a performing arts center, shopping, dining and a trade school.

The financial gains could be huge, Mr. Moritz said in the 2017 pitch. He estimated the return could be many times the initial investment just from the rezoning, and far more if and when they started building.

"If the plans materialize anywhere close to what is being contemplated, this should be a spectacular investment," Mr. Moritz wrote.

The Bay Area is among the country's most expensive regions, even after falling in the pandemic. Economists and housing experts have for decades blamed this on a longstanding housing shortage and California's inability to build enough to meet demand.

Mr. Moritz nodded to this in the email to the investor, arguing "this effort should relieve some of the Silicon Valley pressures we all feel — rising home prices, homelessness, congestion etc." He added that his group had secured some 1,400 acres for less than \$5,000 per acre. The price per acre has since escalated, and the company's most recent purchases have neared \$20,000 per acre, according to court documents and people familiar with the matter.

The purchases burst into public view this spring, when lawyers for Flannery filed a lawsuit in U.S. District Court, accusing landowners of colluding to inflate prices.

The group focused on Jepson Prairie and Montezuma Hills, an agricultural patch of eastern Solano County between the cities of Fairfield and Rio Vista, according to the lawsuit. This area is mostly unpopulated and covered with ranches, windmills and power lines.

In November 2018, the company sent offers to "most landowners in this area," the lawsuit said, and included incentives such as allowing sellers to retain income from wind turbines, as well as stay on the properties rent-free under long-term lease-back agreements. Over the five years, the company purchased some 140 properties from 400 owners, the lawsuit said.

This month, a lawyer representing landowners jointly filed a motion to dismiss the case. In July, three landowners said that they had reached a potential settlement with Flannery. Other owners could not be reached for comment this week, or had declined to do so.

As the offers continued and prices escalated, landowners in Solano County started buzzing about who was buying so much land for so much money.

"They would come with an offer of four and five times over the market at the time," Ms. Moy said. "They were deals that they couldn't pass up."

Flannery's offers were creating multimillionaires across the county, but no one seemed to know what the mysterious company intended to do with land that now amounted to a large chunk of the entire county.

That changed last week, when residents started receiving texts and emails with a poll gauging their opinions on a number of questions. One asked them to rate the favorability of several names including "Joe Biden," "Donald Trump" and "Flannery Associates." Another question began with a description of a possible ballot initiative for a project that "would include a new city with tens of thousands of new homes, a large solar energy farm, orchards with over a million new trees, and over 10,000 acres of new parks and open space."

Ms. Moy cited poor infrastructure, including the two-lane highway bisecting the region that she said was already clogged by super-commuters driving to the edges of the Bay Area and beyond. The area is also prone to regular droughts and is at high risk for wildfires.

"It seems very pie in the sky," she said.

The post [The Silicon Valley Elite Who Want to Build a City From Scratch](#) appeared first on [New York Times](#).

The biggest problem is the kind of people who are financing, organizing and planning on living here.

It is time to directly confront the Silicon Valley cultists and demand FBI, Congressional, FTC, news media and SEC investigations!

The Documented Characteristics of Silicon Valley Venture Capitalists and Tech CEO's prove why they deserve what is happening:

A horrific phenomenon of cultural depravity and white-collar crime is going unchecked in Silicon Valley because Silicon Valley controls the media and the politicians that are usually supposed to check these kinds of things. Millions of pages of news reports, documentaries, interviews and legal transcripts prove the following to be true:

Elitist Cult. Silicon Valley elitists believe they are better than everyone else. Silicon Valley's Kleiner Perkins founder: VC Tom Perkins, said that poor people must be "Nazi's" for not accepting the "superior intellect" of VC's. Silicon Valley's Kleiner Perkins VC Vinod Khosla, took over California's favorite public beach, bribed the White House for "green cash" and got sued for arrogance by a horde of public interest lawsuits. Silicon Valley's Kleiner Perkins founder Ray Lane was indicted for tax evasion. Silicon Valley's Kleiner Perkins boss John Doerr was sued for sexual office abuse and running a "frat house". Most of the VC's and tech CEO's in Silicon Valley are charged with ethics breaches.

Prostitutes. Silicon Valley males hire more hookers and "rent-boys" and fly more sex workers into the Bay Area than any other city in America. Google's and Tesla Investments executives were killed in sex and drug romps with hookers. Google's Eric Schmidt ran a huge "sex penthouse" and promotes infidelity and "anti-marriage". Google's search engine rigging boss died at the hands of one of his hookers. The Silicon Valley VC's had the Rosewood Hotel built at the end of Sandhill Road as a place to take interns and hookers to for sex. Underage sex efforts operated by these VC's and Tech CEO's have created the "Pizzagate" phenomenon.

Rapists and Sexual Coercion of Employees. Young interns are "sent up the hill" by Stanford to the VC's Sandhill Road offices to become sexual playthings for the VC's at the Rosewood Hotel. Ellen Pao sued Kleiner Perkins over the sexual "rape culture" that they promoted. Thousands of women have written books and articles about the sexual intimidation they are subjected to by Silicon Valley VC's and their tech CEO's. VC's Joe Lonsdale, Micheal Goguen and hundreds of others have been charged with rape and sex trafficking. Stanford

University gets "endowments" and "gifts" for hushing rape culture and intern-fluffing up.

Assholes. Fraternity House *Take-What-You-Want* culture is re-percussively promoted in the bars, clubs, meetings, conferences and emails of the VC's and CEO's. The TV Show: **Silicon Valley**, underscores the point of the dangers of infectious asshole-ism in Silicon Valley.

Clones. They assemble those around them that have the same stereotypical facial structure. In a room full of ordinary people and Tech VC's, the VC's faces stand out as Hollywood-type character-cartoon duplicates of each other.

Sexual deviance and extremism. Google's founders have all had extreme sex scandals involving cheating, 3-way sex, divorces over abuse, forced anal sex and other outrages. Their teachers at Stanford have had to quite over their sex scandals. Their willingness and infatuation with sexual extremes defines them as moral degenerates who care little about laws and ethics.

Insider Dysfunctional Parents. The majority of the VC's and Tech CEO's come from rich dynastic families who are cultism-like devoted to "the family bloodline" and run by male oligarchs who believe in a rape culture/oligarch ethos. This belief system is passed on to their children. The oligarch parents threaten to cut endowments to Stanford University if Stanford punishes their son's Frat Houses for date rapes.

Tone Deaf. Silicon Valley Tech people exist in a conceptual ideology reinforcement bubble by never interacting with, or reading information or news from, anyone outside of their group. VC Tim Draper spent vast amounts of money trying to make Silicon Valley it's own country in order to systemize the Silicon Valley tunnel-vision bubble. They want to secede from America because they are offended by normal people who they consider to be low-class and unworthy.

Murders. Rajeev Motwani taught the Google founders how to build Google and was found, mysteriously, floating, dead, in his Silicon Valley swimming pool. Silicon Valley's Gary D. Conley reported John Doerr and Elon Musk for corruption and was found with a bullet in his head behind Beale Air Force base. Three top Tesla engineers reported corruption at Tesla Motors and then suddenly died in a plane crash next to Tesla's factory in San Carlos. There are over 100 mysterious deaths associated with people who had conflicts with Google, Kleiner Perkins and other Silicon Valley oligarchs.

Arrogant. Self-Centered Narcissists. Elon Musk has spent over a billion dollars buying exclusive Google, Twitter, MSM and Facebook hype about himself. Every Tech CEO has a multi-million dollar PR agent assigned to make them look like "Gods of Industry". They regularly hold "Babes and Ball's" parties and sex parties in Woodside that require women to beg for their money. They were trained to be "assholes" and "abusive dominants" via the Stanford Rape/Frat Culture.

Misogynists. All White-Male-Controlled with frat house pasts. Women are used As Sex Objects and *WindowDressing*. The largest number of anti-women news stories, jock/bro blog reports and charges for abuse come from Silicon Valley. VC Steve Westly's CEO friend is notorious for kicking his girlfriend hundreds of times because she "sassed" him. Almost of their Divorce filings include abuse charges against the man.

Manipulation of Employees. Silicon Valley cartel companies practice Scientology-like indoctrination and "cultural programming" of employees. These highly impressionable naive young employees are kept in "controlled environments", sent to "mindfulness programming workshops" and told what kind of political opinions they should have. Tight-knit groups of females experience [synchronized menstrual periods](#) over time, cohesive Google and Facebook employee groups engaged in decision-making [discount dissenting viewpoints](#) in the interests of consensus, and that couples who stay together long enough [begin to look alike](#). A [new study](#) has captured another group phenomenon in Silicon Valley and chronicled in humans' natural habitat: "[group brain synchrony](#)". This is a CIA-like brainwashing technique exploited to get all Google/Facebook/Twitter employees to rapidly adopt the same political views.

Racists. Silicon Valley companies have the lowest rates of hiring, or promoting blacks, in America even though they have a high population of blacks at the edge of their community.

Male insecurity issues. They use **TED-Talks**, **SXSW** and **Synchronicity Events** as self-promoting hype in which to act like an apostle of a tech religion. They buy Tesla cars as a badge of arrogance and mock any male who does not own what they own or who who did not go to Stanford or Yale. These pretentious and ostentatious boys are more inclined to brag about penis-size than family.

Blacklisting. In the **AngelGate Investigation** and **Silicon Valley No Poaching Class Action Lawsuit**, Silicon Valley was exposed as an insider club that black-lists those who look different or are not part of the boys club.

Politically corrupt. Silicon Valley has bribed more politicians than any other domestic region in history. They promote more immigration in order to get cheap labor for their tech companies. They steal their technology and bribe politicians to eliminate patent protections for small inventors that they steal from. Political Corruption and Bribery is *The Norm* for these boys. Silicon Valley created a CIA knock-off called "In-Q-Tel" in order to use CIA technology to manipulate elections at Google, Facebook and Twitter. The 60 Minutes Episode called: "The Cleantech Crash" is about their multi-billion dollar scam using the Dept. of Energy as a slush-fund. They refuse to allow their MSM to report on their corruption and crony kickbacks, ie: Tesla Motors Funding, Off-shore tax evasion, Hooker networks, etc.

Collusion. In the **AngelGate Investigation**, the **Silicon Valley No Poaching Class Action Lawsuit**, and hundreds of other cases, Silicon Valley was exposed as an insider club that colludes to rig valuations, stock markets and employee poaching. They operate in herds within their peer group. They are not inclined to independent thinking. Kleiner Perkins has been caught placing moles and saboteurs inside competitors start-ups. They operate in herds within their peer group. They are not inclined to independent thinking.

Stock Market Criminals. Stock Market Pump-and-Dump, Flash Boy Algorithm Manipulation, Insider Trading, Market Rigging. The Securities and Exchange law violations and FTC monopoly law violations are vast in number.

Burning Man Sex-and-Drugs Devotees. Silicon Valley frat boys have a huge participation in the date-rape goings-on at Burning Man and buy extensive pheromone and skin contact delivery animal-tranquilizer drugs to use on young Burning Man girls.

Minimal Regard For Consequences. Although their PR agents promote them as "green" and "socially positive", it is all hype to get tax waivers and government hand-outs. Mark Zuckerberg's take-over of San Francisco General Hospital's brand was entirely a scam to get him a \$1 billion dollar tax evasion deployment. The Silicon Frat Boys act on impulse and try to buy off the collateral damage later.

Closeted homosexuals. Using the tremendous funds they have at hand from their exclusive monopolies in public media, they push their trans-gender agendas through their bought-and-paid for politicians. This has resulted in a generation of sexually confused children who believe that they should cut their penises off. The top bosses at Facebook, Google, Twitter, Tesla and other companies are lying to the public about their sexuality and using hired wives, known as "beards". If they lie about something so basic, one has to wonder what else they lie about.

Thieves. They steal most of their technology from small inventors who can't defend themselves. They get inventions from Indian engineers and then ship them back to India before the employees can get any stock or IP rights. The tech CEO's send their VC friends to competing start-ups to spy on competing technologies and steal it. The VC's say they are just doing "due diligence" but they are actually sucking the competing start-up dry of IP and staff and making a clone of it under another name.

There are so many other awful things about the people of Silicon Valley. You get the picture. Silicon Valley is a swamp and a cesspool and they deserve bankruptcy, shame and forced transparency for the exposure of ALL of their corruption.

WRITE YOUR REGULATORY AGENCIES AND DEMAND INVESTIGATIONS AND PROSECUTOR ACTION TODAY!

SVB collapse will have 'major' impact on tech industry: Fears over mass layoffs and paycheck delays for thousands of employees at companies that do NOT bank with SVB - but use payroll providers that do

Investors are only insured up to \$250,000 and as well as tech firms, many Silicon Valley workers use Santa Clara-based bank for their their personal cash flow and mortgages.
